Your partner for techno-commercial AI.

An industrial AI platform and specialist team for businesses that engineer, bid and deliver complex projects.

The problem today

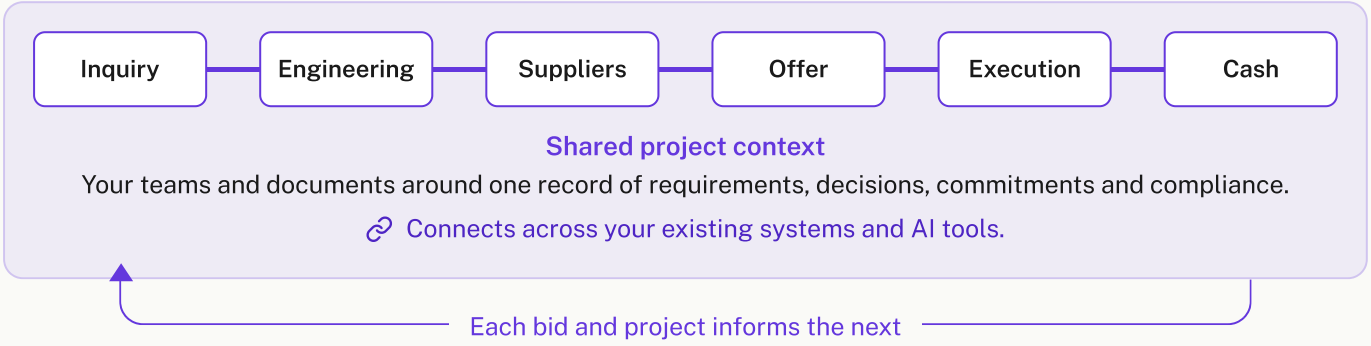

Winning and delivering work depends on connected decisions. Today, they are scattered across teams, documents and systems.

AI at individual steps makes tasks faster while handoffs, shared context and learning stay disconnected. **Adding technology to solve yesterday's problems does not yield high ROI.**

With Ranger

Ranger connects the work, accelerates decisions and aggregates the value.

Immediate operational value

Your team gets hours back from manual rework, with more consistent checks against your requirements.

Compounding business value

Handoffs get clearer and decisions carry across departments. The same team wins and delivers more.

Who we work with

Global presence, across the industrial supply chain.

Trusted by some of the leading companies in the industry, including

KOCH · Waters · CELEROS FLOW TECHNOLOGY · FARABI PETROCHEMICALS · PACE SOLUTIONS · MRP solutions

Regions
United States, Canada, Europe, GCC, East Asia

Sectors
Energy, pharma, defense, civil, manufacturing

Who we serve
Owners and NOCs, EPCs, OEMs, manufacturers and sub-vendors, government

Security

AICPA SOC 2 · ISO 27001

SOC 2 Type I attested.
Third-party A-grade security rating.

Backed by

bonfire · inovia · PANACHE VENTURES · 25madison · northside ventures · :defined

Why Ranger

One partner, accountable for platform, process and results.

The usual options	What Ranger brings
– General AI that needs heavy tuning before it is useful	✓ An AI platform built for industrial & complex work
– AI inside each application, with context stuck in silos	✓ We build your SOPs and know-how into the AI for you, that's on us
– Internal builds that are hard to maintain and scale	✓ Our experienced techno-commercial team delivers and scales with you
– A tool, with the results left to you	✓ Value scoped and measured against your business goals

Why teams work with Ranger

Choose what matters most to you. We start there.

Increase bidding capacity
More tenders with the same team, as hours move from rework to revenue-driving work.

Strengthen win probability
A long-term commitment, built with your team across the full bid cycle.

Reduce risk before it reaches the project
Scope gaps and commercial risks caught early.

Improve accuracy and compliance
Requirements checked against spec and contract.

Negotiate better with suppliers
Sub-vendor offers and costs compared line by line.

Carry bid commitments into delivery
The project team starts from what was offered.

Where to start

Begin with one workflow. Extend the connected capability as value is proven.

Pre-award: inquiry to offer

Post-award

Capture
Sales and bid management

- Tender intake and risk register
- Requirements register
- Scope and missing items

Engineer
Technical and supplier review

- Engineering configuration
- Compliance scorecard
- Sub-vendor management

Bid
Proposal and commercial

- Cost, risk and strategy
- Technical and proposal package
- Clarifications and queries
- Revised offers and edits

Deliver
Projects, execution and cash

- Order review and handover
- Engineering and procurement
- Production and quality
- Delivery and acceptance
- Invoicing and collection

Every module runs on one shared knowledge base. Module names adapt to how your teams work.

Proof of value

See it work before you commit.

2–4 weeks to see results on your own work, before a wider rollout.

Ranger is shaped around how your team already works. We size the return on your data, not on another company's case study.

01
Scope
One workflow and what success looks like, agreed together.

02
Configure
Ranger set up on your documents and tools.

03
Run live
Your team runs live work through it.

04
Review
Results and return compared against today. You choose whether to expand.

Let's start with a 30-minute conversation.

We will show a relevant industrial deployment, find the first result worth proving for your team, and how Ranger fits your existing AI investments. Your IT or AI lead is welcome.
